Native || Git&Github
- Computational Thinking ||
Operating Systems || Linux
|| Version Control Systems
|| Software Development
Life Cycle (SDLC)
- SCRUM & Agile
Methodologies || JIRA
- SQL

SUMMARY

During my university years, I took many courses on management and organizational leadership. I have realized the importance of computational thinking and algorithmic logic in solution design, decision making and following the up-to-date trends. I believe these concepts are crucial for professional business life, that's why I chose to be Fullstack Web Developer.

I like to generate new codes for any kind of problems and spend time on creating. Also, I have been dealing with 3D designs since I was little and to me these skills will also help me during a web design process. So far, I have taken almost all necessary -but it never ends- courses to guide me through this journey.

EXPERIENCE

10/2020- present

VOLKSHOCHSCHULE, WEIMAR
